

## CAN Adapters: How can I use your vs\_can\_api library from other languages than C/C++?

You can use any programming language that provides calling functions from a dynamic library (\*.dll or \*.so files). We provide wrapper for some programming languages like:

- C#
  - VB.NET
  - Delphi
  - LabVIEW
- 
- more to come on demand

You'll find these wrappers in  
[VSCAN API x y z.zip](#) under \Wrapper\Languages.
