

CAN Adapters: How can I use your vs_can_api library from other languages than C/C++?

You can use any programming language that provides calling functions from a dynamic library (*.dll or *.so files). We provide wrapper for some programming languages like:

- C#
- VB.NET
- Delphi
- LabVIEW

- more to come on demand

You can find these wrappers in [VSCAN API x_y_z.zip](#) under WrapperLanguages.
