CAN Adapters: GUI for modifying USB-CAN parameters

With [USB-COM Configurator](#) you can select desired COM port and apply settings, that are optimized for USB-CAN devices.

- set 'Latency Timer' to 1ms

- activate 'Event on Surprise Removal'

- set all baud rates to 3MBit except of 115.2k

Execute following steps to set these settings at once:

- Select com-port (Make sure that it is the CAN adapter)

-

Press
'Optimize for USB-CAN'

-

Press
'OK'
